

# Why Partner with IDVerse?

## UNRIVALED ACCURACY & PERFORMANCE

Our fully automated solution verifies the authenticity of user identities with **far greater reliability than manual methods**. In improving the accuracy of the identity verification process, partner platforms mitigate the risk of fraud, enhance regulatory compliance, and safeguard sensitive consumer data more effectively.

# 97%

of decisions provided in **a minute or less**

# 99.998%

face-matching **accuracy**

# 100%

**liveness fraud** assessment accuracy

# 99.7%

of languages on printed ID documents **can be read and extracted**

## REMOVING BIAS FROM DECISION-MAKING

Manual IDV methods are inherently susceptible to human biases, whether conscious or unconscious, which can affect the assessment of ID documents and verification outcomes. **IDVerse has encoded inclusivity into the algorithms that power our products**. This helps to ensure that everyone, everywhere gets an equitable onboarding and authentication experience.

# 0%

**demographic bias**

for all demographic groups measured, as a result of Bixelab Bona Fide Presentation Classification Error Rate (BPCER) evaluation.

## ULTRA FAST TIME TO REVENUE

Time is money, and with IDVerse, partners and their customers can accelerate their time to revenue significantly. Our enterprise IDV solutions are designed for **swift integration, taking weeks, not months**. Furthermore, our **API-driven approach** ensures a hassle-free integration process, allowing partners to start seeing ROI within mere months.

IDVerse has wired on new partners in **as few as 72 hours**

# 72

IDVerse can recognize **over 16,000 ID types in 142 languages from more than 220 countries and territories**. The world's leading companies like Amex, HSBC, and Hertz trust us to help their users prove their identity in seconds. The IDVerse solution has been tested and **certified to meet the most stringent standards in the industry**, including NIST, ISO, iBeta, and algorithmic Zero Bias AI™ specifications.
