

IGAMING/GAMBLING

Identity Verification

Powered by state-of-the-art generative AI, our identity infrastructure system is fully automated and can **verify the identity of players within seconds**.

The future of gaming is online and global, and we help you address key issues like **bonus abuse, money laundering, proof of address, and account takeovers** without compromising on player experience.

 **16,000+**
ID documents supported

 **220+**
Countries & territories

 **142**
Languages & typesets

**Expedite player onboarding **

Verify new players in seconds with our automated solution. With no need for agent intervention and a definitive outcome, you'll slash drop-offs, especially during large-volume events.

**Stop bonus abuse in its tracks **

Our biometric verification process can spot real, live players making a genuine attempt to sign up & prevent other from creating extra accounts to abuse bonus offers.

**Halt account takeovers **

Quickly and securely reauthenticate players with biometric liveness, using their originally approved ID document. The entire process can be embedded in your platform for improved player experience and retention.

**Ensure KYC/AML compliance **

Our platform meets the most stringent privacy, security, and integrity standards and covers almost every identity document in the world. Extract and verify information from the identity document to meet your KYC and AML obligations.

IDVerse is the global leader in remote identity verification solutions for online gaming and sportsbook companies. Our technology authenticates government-issued ID documents and matches them to a liveness capture of a user's face—all via mobile device.
